

# LCC Tax Reclaim

## Added value with every per cent

In cooperation with **VAT IT**, Lufthansa City Center offers a comprehensive refund service for VAT paid abroad. Our partner not only processes all original supporting documentation, but also deals with any correspondence with the authorities.

VAT IT is the world's leading provider of solutions in the field of international VAT refunds and offers companies a comprehensive service.

### **Comprehensive service for VAT refunds**

You have the choice either to compile the relevant paperwork yourself and pass it on to VAT IT, or to allow a VAT IT employee to do this for you as part of an on-site audit.

In both cases, VAT IT will subsequently produce the documents for the claim and complete the application with the foreign tax authorities. A German-speaking customer advisor will assist you throughout the refund process.

In addition, you will receive online access to a detailed review of the applications and their status (online reporting).

A refund of foreign VAT can be applied for in the following countries: European Union, Switzerland, Norway, Australia, Canada, South Korea, Japan, New Zealand, Taiwan. The charges for this service are result-related and the agreed fee is dependent on pre-tax volumes.

This is even easier using VAT Cloud. VAT Cloud is the leading software in this area and links your cost management system directly with the relevant tax authorities.
